

GLOBAL HUMANITARIAN MISSION

Clean Water For The Thirsty

Your Gift of \$10,913.18

Will Take Families From This

Will help ease the plight of impoverished families in rural villages throughout Honduras. Since many communities do not have a water distribution system, the lack of access to clean water is a significant problem for the poor in Honduras. They are forced to rely on surface water sources such as rivers and streams, which are shared by animals, and are likely contaminated and unreliable.

To This

Drilling and construction of a **Water Well** with a 22HP diesel motor drill rig. To include

- Solar submersible pump, ½ HP
