This is the way of life for almost 50% of Hondurans who live below the poverty line, on less than \$2/day.

Most families can only afford to eat twice a day. The situation was further exacerbated by the COVID-19 pandemic and hurricanes Eta and Iota.

They live in constant fear that their fragile homes will not survive another storm.

Not only do they suffer leaks and dirt floors that turn to mud in wet weather,

But they are subject to Chagas disease -

And likely heart failure,

From the disease-carrying mosquito.
